

Move the Market

with East Daley's Gas Supply and Demand Data

East Daley has released the first-ever Supply and Demand Forecast Report and Data Set that connects producers through processing, to pipelines for a complete value chain analysis out of each basin. Leveraging East Daley's Patented Gathering & Processing database, this unique methodology provides comprehensive macro-view with visibility into micro constraints and relationships.

ACCESS & DISTRIBUTION:

Contact us for package details at sales@eastdaley.com

DRIVING ENERGY TRANSPARENCY

LEVERAGE REPORTS AND DATA TO:

- Access asset-level forecasts at the macro- and basin-level
- Triangulate multiple data sets to reduce single source bias
 - Balance and forecast production with asset-level throughputs
 - Triangulate pipeline sample to actual G&P system volumes
 - Tie rig activity and forecasts to processing plant and system inlets
- Detailed insight into and understanding of the supply chain

REPORTS AND EXCEL DATA SETS AVAILABLE:

- Macro gas supply and demand report and data set
- Permian, Northeast, Rockies region basin reports and data sets

DISSECTING THE ENERGY VALUE CHAIN

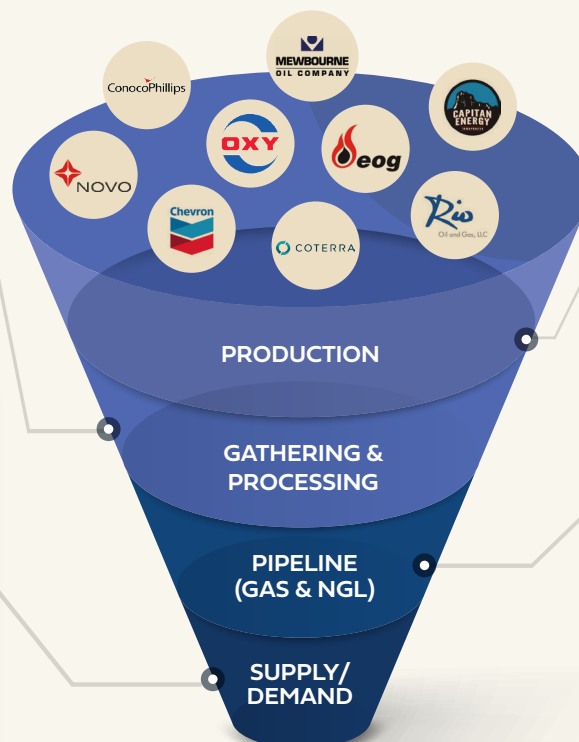

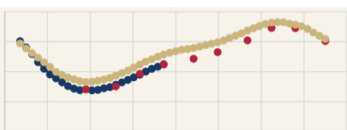

GATHERING & PROCESSING

East Daley validates our production forecasting through midstream infrastructure.

SUPPLY/DEMAND

East Daley benchmarks our resulting supply forecast through EIA's monthly dry gas production and weekly storage.

PRODUCTION

East Daley analyzes private and public well-head production data, custom production guidance, private rig activity to understand U.S. production.

PIPELINE (GAS & NGL)

East Daley forecasts volumes on a pipeline-by-pipeline basis to identify egress constraints.
